

Ocean Drilling, Inc

TheCasesolutions.com

Ocean Drilling, Inc

Introduction

- The ocean provides a massive amount of resources we consume everyday.
- One of the biggest resources we consume is oil.
- We use oil everyday in our lives.
- We use it in our vehicles and for heating.
- Offshore drilling is dangerous because the pipes may break and cause oil spill.
- Oil spill will affect all of the creatures in the ocean.
- The good thing about drilling is that it provides energy for us to use everyday.

Multimedia

A circular graphic with the word "Multimedia" at the top. Inside the circle are four small rectangular images: a person in a hard hat, a drilling rig, a close-up of a pipe, and a person in a hard hat. The images are arranged in a 2x2 grid.

Data

- Oil is the single most valuable natural resource in the world.
- The oil spill will affect the marine ecosystem and business who rely on the ocean and drilling.
- The oil spill will affect the marine ecosystem and business who rely on the ocean and drilling.
- Oil spill will affect the marine ecosystem and business who rely on the ocean and drilling.
- Oil spill will affect the marine ecosystem and business who rely on the ocean and drilling.

Conclusion

- Oil is the single most valuable natural resource in the world.
- The oil spill will affect the marine ecosystem and business who rely on the ocean and drilling.
- Oil spill will affect the marine ecosystem and business who rely on the ocean and drilling.
- Oil spill will affect the marine ecosystem and business who rely on the ocean and drilling.
- Oil spill will affect the marine ecosystem and business who rely on the ocean and drilling.

- The good thing about drilling is that it provides energy for us to use everyday.

Multimedia

A circular graphic with the word "Multimedia" at the top. Inside the circle are four small images: a drilling rig, an oil spill, a bird, and a person. A white bird is flying towards the circle from the left.

Data

- Oil is the single most valuable fuel for the population, a primary source of energy and heat for the industrial.
- The hydrocarbon oil is the source of fuel.
- The oil spill will cause the water and kill the sea creatures.
- Many offshore drilling will be in an area where there are no land.
- The oil spill is the source of the economic jobs and business rely on the ocean and drilling.
- The oil spill also affect the business and consumer who rely on the ocean and drilling.
- Oil spill will cause the environmental because the pipeline is a source of pollution.
- Oil spill will affect the water in the atmosphere that will cause global warming.
- The pipeline is a source of pollution and will affect the water under the ocean and air.
