Backdrop of crisis?

Working of Banks;

Banks borrow short and lend long

This creates inherent fragility

No problem in normal times, i.e. when people have confidence. However, problem arises when confidence disappears.

Confidence disappears when one or more banks experience solvency problem (e.g. bad loans)

TheCaseSolutions.com

Genesis & Development of Crisis:

*Efficient markets paradigm was very influential
It was captured by bankers to lobby for deregulation*

Consequently, Bankers achieved their objective

*Banks were progressively deregulated in
US and in Europe*

*Culmination was the repeal of the Glass-Steagall act
in 1999 (Clinton-Rubin)*

Varied Dimension of Crisis:

Global spread of the crisis

Financial Globalization

*Decline in the credibility of International Financial
Institutions*

*State Capitalism and
Protectionism*

Credit Crunch

*Crisis of Confidence and Credibility in the Financial
Market*
