New Understanding of Innovation

Innovation also fills the gap in our mind.

How to tell if it is an innovation?

A change or an invention becomes an innovation when it fills the gap in your mind by making you realize something indeed needs to innovate.

TheCaseSolutions.com

Critical Question in Mind Map Phase 1

"Does innovation have to be useful?"

TheCaseSolutions.com

Answer to the Question

--- New Understanding of Innovation

Yes, it has to be useful.

Because the mission of innovation is to address clients' practical issues, as well as to provide possible solutions to the problems they may face in the future. Otherwise, innovation will stay at the level of technicality and idealism, therefore simply becomes an invention.
