What is the Canadian Pacific Railway?

ThecaseSolutions.com

The Canadian Pacific Railway is a transcontinental railway that runs from coast to coast across Canada. It is one of the largest and most important transportation infrastructure projects in Canadian history. The railway was built by the Canadian Pacific Railway Company, which was founded in 1872. The railway was built to connect the east coast of Canada to the west coast, and to provide a means of transportation for goods and passengers across the country. The railway was built at a cost of over \$100 million, and it took over 20 years to complete. The railway was a major achievement for Canada, and it played a key role in the development of the country.

Why was the Canadian Pacific Railway Built?

ThecaseSolutions.com

The purpose of the railway was to connect the east coast of Canada to the west coast, and to provide a means of transportation for goods and passengers across the country. The railway was built to support the growth of the Canadian economy, and to provide a means of transportation for the growing population of the country. The railway was built to connect the east coast of Canada to the west coast, and to provide a means of transportation for goods and passengers across the country. The railway was built to support the growth of the Canadian economy, and to provide a means of transportation for the growing population of the country.

Shareholder Activism at Canadian Pacific

TheCaseSolutions.com

What is the Canadian Pacific Railway?

TheCaseSolutions.com

- The Canadian Pacific Railway is a transcontinental rail way that goes from Canada's east coast to west
- It was a way for people to travel more efficiently across the country
- The railway made communication between the different provinces easier
- Trade was increased within the country because trade agreement with U.S had ended
- It is a railway that goes from B.C to the Montreal
- The railway made access to the territories easier

Why was the Canadian Pacific Railway Built?

TheCaseSolutions.com

- The purpose of this railway was to replace older less efficient means of travel
- It was believed that if it was easier to access the Territories more people will go and live there
- To stop Canadians from depending on the United States to travel
- To increase the new countries economy
- To bring more money than was used to build it
- To have more people from elsewhere to be interested in moving to Canada so that Canada can afford to stay out of debt

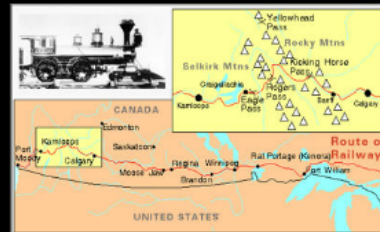

Who Built it?

TheCaseSolutions.com

- Chinese immigrants were used as slaves to build the railway
- Many of the workers died working because it was dangerous to build the railway over hills and through different terrain
- Workers often fell off the cliffs while working
- A new company called Canadian Pacific Limited was in charge of building the Railway
- These Chinese immigrants were used because the work was extremely dangerous and no one wanted to do it, and the countries population was also too low for them to complete it themselves
- The Chinese workers were only paid 75 cents to a dollar per day for food and clothes and other necessities
- White workers were paid 1-2 dollars per day and were provided necessities

- The railway cost too much for the new country to afford
- Many citizens were upset that all the money was going towards a vision that they believed could not become a reality

Issues that were Faced

TheCaseSolutions.com

The government gave the railway 24 million dollars in order to complete the project

-The 25 million dollars proved to be way to little a little while after it was provided to the construction

-Money was requested from the government multiple times in order to complete the construction of the railway

-Canadian Pacific Limited was give 10 million hectares of land which is equivalent to 24710538.15 acres to create the railway

-They were also given Tariff free railway materials

-The government provided them a 20 year manoply over the land

When was it built and Where?

TheCaseSolutions.com

- The Canadian Pacific Railway (CPR) started its construction in Montreal in 1881
- The (CPR) first train was made in Port Moody, BC June 30, 1886
- The (CPR) ended in Port Moody, BC
