How does matter move through the biosphere?

Unlike the one-way flow of energy, matter is recycled within and between ecosystems.

TheCaseSolutions.com

Biogeochemical cycles

Elements pass from one organism to another
and among parts of the biosphere through
closed loops.

TheCaseSolutions.com

Biological Process

Any and all activities performed by living organisms. These include, eating, breathing, "burning" food, and eliminating waste products.

The action of lightning!

Why is it important?

Recycling in the Biosphere is helpful to living organisms because it helps break things down, fossil fuels, and can create spectacular visuals to be enjoyed.
