Thesis Statement:
Wildfires are
catastrophic and
need trained EMT's
to assist with the
preparation,
responce, rescue,
and recovery.

CaseISM.com

Why is this Important?

This topic is important because certain information could be lifesaving. You need to know how to prepare and what to do to save yourself from wildfires. If you wanted to be an EMT that helps with wildfires then some of this information could be helpful to you.

Wildfire Statistics

I would like to start of my first key point off with some statistics about wildfires:

- *According to the NIFC, there is an average of 105,534 fires a year.**
- *Four out of five wildfires start because of humans.**
- *On average, wildfires burn five million acres of land a year.**

How do wildfires start?

Wildfires can easily be caused by humans or nature. Lightning can strike a dry tree or shrub and can light the things around it on fire. Once something catches fire in forests, it's hard to stop it from moving on through the rest of the forest.
