## SHIP MANAGEMENT TECHNICAL- COMMERCIAL-CREW

We offer customers, a tailor made ship management service to suit their specific requirements, including plan approvals, build supervision, sale and delivery, and full vessel operational management incorporating crewing, purchasing, insurance, surveys, and accident investigation. As part of our comprehensive ship management service, we allocate Technical Superintendents to groups of vessels to monitor the operation, performance, and condition of the vessels by:

- Regular condition assessments and performance monitoring
- Planned and projected maintenance
- Dry dock planning and supervision
- Surveys, certification and vetting

In addition to the ship management services detailed above, our Technical Superintendents and Marine Consultants take care of repairs ,dockings, new building, plan approval and supervision as well as Flag and Class liaison.
