Problem Statement

- Generic platform
- Avoid fraud
- Provide Transparency

Thecasesolutions.com

Motivation

To provide an Generic flat form for registering the property details and to calculate the property tax based on their location

Existing System

- The existing system is taking information of the property from the owner to calculate the property tax every time and its restricted for BBMP use only
- There are various diverse applications which work for different states which will simply consider the system of their state

Proposed System

The proposed system registers the property details and calculates the tax and a generic flat form is provided which can be used all over india or any other country also .

Problem Statement

- Generic platform
- Avoid fraud
- Provide Transparency
