The Electric car. the first one the came out is the GM EV-1. It was really smooth and you didn't have to pay for gas anymore. You just need to plug it into the wall. Unfortunately, GM got complaints from the gas companies to call back the car. Everyone that had one was so disappointed because they said that it was the best car on the market. Today, several electric cars exist on the market, for example, The Nissan Leaf, The Chevrolet Volt, The Ford Focus (electric), The Mitsubishi i-MiEV.

In 1958 the internet was in its first phase of development, it started as a race between the soviet union and the U.S. The U.S. had a first positive result of the internet working with the communication between Stanford Research institute and University of california in Las Angeles. Afterwards the internet has been released to the public after further adjustments to the public in 1992. But it wasnt used the same way we do today.

Larry Page and Sergey Brin invented Google as a private company and then it became publicly released on August 19, 2004. Google was initially called "Googol" because of a spelling mistake. They fixed the spelling mistake. Google is what it is today only because of the first funding of 100,000\$ by a man named Andy Bechtolsheim who is the co-founder of Sun Microsystems. On June 7, 1999, a fundraiser for google added to 25 million dollars.

The Segway PT is a two-wheeled, self-balancing, electric vehicle used for personal transport. Segways have had success in markets like for mall cops, warehouses, industrial sites, as well as tourism. The first Segway resembling the modern Segway PT, it was filed on May 27, 1994 and issued to Dean Kamen on December 30, 1997. However, it wasn't until 2001 when Kamen finally introduced his invention to the public.

In 2000, digital music players were either big and clunky or small and useless with equally terrible user interfaces. Apple saw the opportunity and announced the release of the iPod, their first portable music player on October 23, 2001. Steve Jobs forever changed the course of media and entertainment distribution when he unveiled his creation, the Apple iPod. The iPod was announced several months after the release of iTunes, a program that converted audio CDs into compressed digital audio files, and could organizes your digital music collection.
