Reviews Say

That the product is...

...is not a good thing. It is not a good thing. It is not a good thing.

Dell Corporation

Dell was originally started in a humble dorm room at University of Texas in Austin by Michael Dell.

Dell Inc has been around for 27 years, and for most of that time it has been run by two men - actively demonstrating the "two-in-a-box" leadership style

Here's a few questions

1. What does the case that Dell's transformed strategy over the years in terms of where to compete. How to compete, and with whom to compete?
2. What are the major issues facing Dell today as Michael Dell returns to the company?
3. How would you help in addressing the issues that Dell faces?

Where are they now?

Rollins was fired in 2007 and business went down hill for Dell from there. Though there isn't much information about Rollins after he left studies show he is doing much better since was fired from Dell than he ever did while he was there.

Let's Compete

Believe it or not, Dell Inc has actually stuck to their original sale model for the past 27 years. Even though our article said that the people "were looking forward to change," Michael Dell refuses to upgrade or progress, claiming that the original concept is a strength of the company.
