Operational Cost
According to a recent study, companies that invest in sustainable practices can save up to 10% on their operational costs. This is due to a number of factors, including reduced energy consumption, lower waste disposal costs, and improved employee productivity. The Case Solutions is committed to reducing its operational costs through sustainable practices.

TheCaseSolutions.com

Operational Cost

According to a Nielsen Global Survey, only 42% of North American consumers and 40% of Europeans would consider paying more for an environmentally friendly product.

Hewlett Packard has saved \$870k per year by changing their shipping practices to utilize returnable slip sheets instead of wooden pallets.

Epson has saved \$300k per year by reducing excess foam in their packaging.

TheCaseSolutions.com

Integration

Office furniture industry lacks sufficient information on cost improvements via environmentally friendly initiatives.

Marketing strategies are similar between rival companies; none stand out to the average consumer.

Majority of consumers are not willing to pay more for eco-friendly products or companies, necessitating need to share as cost savings

Integrate environmental thinking into lean initiatives
