\$1.25

Beatles New Release

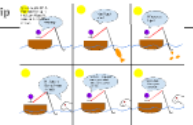

Just yesterday, June 29, the Liverpool legends graced us once again with another rock album. The album titled *Anthology 4* has already sold more than 2.5 million copies worldwide. Lead singers, Paul McCartney and John Lennon's appealing voices touched all listeners. Each of their eleven songs were professionally executed. Ringo Starr never missed a beat on his drum set and ultimately held the band together. Lennon and Harrison really brought the songs to life with their guitars while McCartney backed them up on his bass. Once again, the Beatles did not disappoint. Their excellent album, *Anthology 4* featured extremely catchy songs that I surely will have stuck in my head for a lengthy period of time.
