## *Introduction*

**Shark fin soup is a type of soup which originated in China. It is made out of shark fin and flavored with chicken stock, or sometimes other stocks. Shark fin soup is eaten all over the world, but there are some things that people think is not good, though it is not stopped because it is seen as a tradition.**

# ***FOR***

**Shark Fin soup is very important in Chinese cuisine and is nearly vital during banquets, weddings, and special occasions, etc. The dish symbolizes wealth, power, prestige, and honor. At weddings, banquets, and on special occasions, the dish is a show of respect and appreciation to the guests.**

## ***AGAINST***

**Shark fin soup should definitely not be eaten, as it will make sharks extinct someday. In 1996, only 15 shark species were threatened for death, but now it has went up by 12 times in less than a decade. Up to 73 million sharks are killed a year just to supply the demand for shark fin soup. Sharks are very slow growing, so they will be extinct someday as people are killing them way too fast. For the growing demand for shark fin soup, soon, it will bring all sharks to extinction.**
