Value Stream Mapping

The objective of Value Stream Mapping is to create a picture of how items (such as materials, designs, or customer needs) flow through the value stream – from raw materials and inputs through to the customer's end product.

Below steps must be taken when using the Value Stream Mapping tool:

- Step One – Identify the Product or Service to Map
- Step Two – Draw the Current Value Stream Map
- Step Three – Assess the Current Value Stream
- Step Four – Create a 'Future State' Value Stream Map
- Step Five – Create a Plan to Implement the Desired State
- Step Six – Implement the Plan
- Step Seven – Review the Results, and Repe

Schedule for the Workshop

	Monday 29 th May 2020	Wednesday 31 st May 2020	Thursday 30 th May 2020
08:30	Registration	Registration	Registration
09:00	Check the Product/Service/Process (SQ)	Check the Product/Service/Process (SQ)	Check the Product/Service/Process (SQ)
10:00	Value Stream Mapping (VSM) - Current State	Value Stream Mapping (VSM) - Current State	Value Stream Mapping (VSM) - Current State
11:00	Value Stream Mapping (VSM) - Future State	Value Stream Mapping (VSM) - Future State	Value Stream Mapping (VSM) - Future State
12:00	Lunch	Lunch	Lunch
13:00	Value Stream Mapping (VSM) - Future State	Value Stream Mapping (VSM) - Future State	Value Stream Mapping (VSM) - Future State
14:00	Value Stream Mapping (VSM) - Future State	Value Stream Mapping (VSM) - Future State	Value Stream Mapping (VSM) - Future State
15:00	Value Stream Mapping (VSM) - Future State	Value Stream Mapping (VSM) - Future State	Value Stream Mapping (VSM) - Future State
