**Physical Features**

Physical features include mountains, hills, valleys, rivers, and streams. These features are important in determining the location of a business. For example, a business located in a valley may have a better location than a business located on a hillside. Physical features can also affect the cost of doing business. For example, a business located in a mountainous area may have higher transportation costs than a business located in a flat area.

# Piedmont Airline: Discount Seat Allocation (A)

Justin Nguyen, Charles Hoover, Cristhian Restrepo, Ayman Saad

**Prominent Crops**

A wide variety of crops are grown in the Piedmont.

- Corn
- Peanuts
- Soybeans
- Cotton
- Sorghum
- Wheat

**Physical Features**

Georgia's second largest region is the Piedmont. While the Piedmont is the second largest region in Georgia, the Piedmont has the largest population in Georgia. Major cities such as Atlanta and Athens exist in the Piedmont. The Piedmont is also bordered to the south by the Fall Line.

**Fall Line**  
The Fall Line is a natural boundary that separates the Coastal Plain region from the Piedmont Plateau. This is where Georgia's hilly & mountainous land meets the coastal plain.
