Affects of speeding

Thecasesolutions.com

Speeding not only affects the driver in which caused the crash but it also affects:

- pedestrians
- victims
- passengers
- families
- financial strain

Speed Statistics

Thecasesolutions.com

- In 2011 376 lives were lost on the road, mostly as a result of negligent driving by males between the ages of 17-25.
- Exceeding safe speeds: most drivers (89 per cent) admit they exceed the speed limit at least some of the time.
- Males between the ages of 17-25 are recognized as 'risk takers', this is reflected by high insurance premiums.

How fast is too fast?

Thecasesolutions.com

It is proven by the RTA and many road safety organisations that up to 5km/h difference can make all the difference between ending a life and leaving a bruise.
