

Contribution

By having my thesis work done with analysis in megaprojects or megaprojects and risk, I would like to contribute my effort to interpret the outcome of megaprojects result in terms financial language and what lessons can be taught through studying the projects.

TheCaseSolutions.com

Main issue

It is not the size or scope of the megaproject that makes it complex but rather the time factor. The set in for many megaprojects take upwards of 10 years to become fully operational and these are all subject to **unpredictable** cost overruns that can - and often do - alter the rules of the game. But it's not just technology change, **corporate culture, governance** and regulatory pressure. Crisis are all constantly changing and adding here complexity to the construction and delivery of megaprojects.

Mega projects in Mongolia

Oya's major project, the **Upper Gobi** project, is a 1000 km long pipeline that will transport oil from the Gobi Desert to the coast. The project is a joint venture between Oya and the Mongolian government. As a result of the project, Mongolia's revenue is expected to increase by 20% and the amount of investment in the country is expected to rise from 1.5 billion to 2.5 billion dollars.

Purpose/What it is for

Megaprojects often bring mega challenges. Cost and time overruns, obsolete technology, shifting political support and turbulent economic conditions are all frequent distractions that emerge from megaproject delivery. To have a successful megaproject, we must measure the time taken in financial terms, positioning or clearing the **megaproject delivery** flow inefficient or harmful. It should be in capacity of Mongolia. This is for to have a side to side view of failure of delivery and successful implementation of project. My purpose to find out what **sum of money will be circulate** behind these 2 obstacles.

Mega projects in Mongolia

- New railway
- The new railway project is a mega project of political, economic and social impacts in Mongolia.
- According to the current estimates, the required investment for the project is 200 million.
- In recognizing the impact, the government has been approved and the withdrawal from the Chinese bank through the development bank of Mongolia. It of course, some 1.2 billion has been transferred to the project account.

Motivation

Huge budget massive footprints, under-spared train formation benefits will impact our daily lives and quality of environment. As a student of Mongolia, I want to dig more beneath the **investment** side through into infrastructure and underdeveloped mining projects. Moreover, I would like to examine the **challenges, opportunities, risks** and complexities facing those involved in creating and operating these important assets.

TheCaseSolutions.com

Introduction

A megaproject is a definition that can mean that a **project** must take more than 100 million to complete. It is a project that has a significant impact on the economy and society. It is a project that is a **major** investment in infrastructure and development.

TheCaseSolutions.com

In The Future

In the future there will be ways to extend from the 2011 which will help decrease the risk of delivery. The 2011 data is only an indicator of how well for many years to come. Currently they need 1.2 million barrels of oil per day that that's expected to rise to 1.7 million barrels per day by 2019.
