TheCaseSolutions.com

Is it legal?

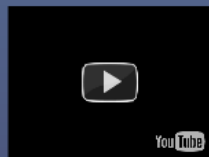

Marijuana is legal in 13 state throughout the US but only 4 states are leGAL and not for medical purposes

TheCaseSolutions.com

Reason to legalize

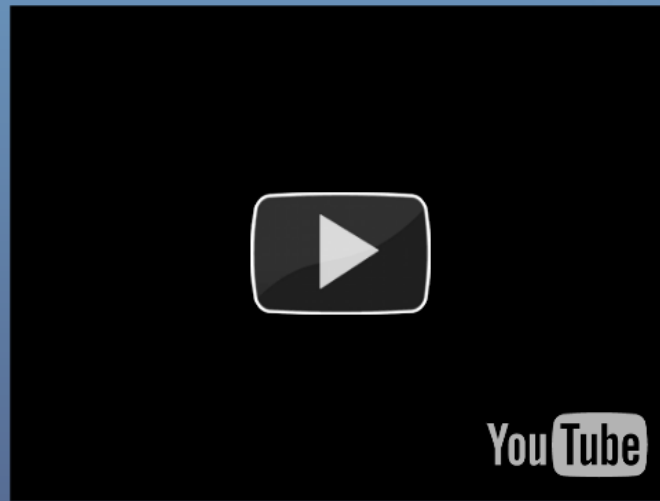

1. Prohibition has enormous social costs.
2. The benefits of criminalization are minuscule to nonexistent.
3. Cannabis has legitimate medical effects.
4. Legalization won't lead to increased use.
5. Cannabis is less harmful than alcohol or tobacco

Economic booster

Legalizing marijuana on a federal level would provide economic benefits for the United States in the billions, precisely at a time when the federal economy needs a major boost. It's not just the feds, however, who would benefit; legalization would provide top-down economic improvements in local communities, state coffers, and more. In addition to bringing in funds, it would save regional and state governments substantial sums in currently wasted law enforcement dollars.
