

**Climatic:**  
The weather in Thailand is usually hot and humid across the country most of the year. Thailand's seasons are divided into the hot season, cool season, and the rainy season.

**Climatic:**  
The rainy season is from June to October and the dry season is throughout the rest of the year. The temperature range is normally from an average of a high 38° C to a low of 17° C with the highest temperatures from March to May and the lowest in December and January.

**Economy:**  
Thailand is rich in natural resources. There natural resources are Tin, rubber, natural gas, tungsten, tantalum, timber, coal, fish, gypsum, lignite, fluorsite, and arable land.

**Economy:**  
The country produces rice which is by far the leading commercial crop, followed by rubber, corn, sugarcane, coconuts, and soybeans.

**Economy**  
Economy in Thailand:  
- Export depends on market and tourist  
- exports (exports goods and resources as rice to countries in and out the world)  
- tourists (creates clothes and shops a around the world)  
- tourists (people come to visit Thailand because Thailand is a big popular attraction because of the rice weather and amazing sites as beaches and cities.)

Most Thai people who live in Canada, tend to live in larger cities as  
- Toronto  
- Vancouver  
- Montreal  
- Ontario

**Population**  
The population of Canadians claiming the ethnic origin of Thai are  
- 10,015

The reason why most Thai people live in Toronto, Vancouver, Ontario and Montreal are because of the temples, and where the temples are, are where the people are.
