Integrated Marketing

Finally, we answer the question - "Why should I Integrate My Marketing?"

The most elite marketers of the corporate world do not change any part of their campaigns without the correct data. Without a reason, how do you know your change is going to have a positive impact on the campaign results?

Integrated Analytics - That's How.

Choosing an Integrated Marketing Service Provider to integrate each campaign module with Google Analytics helps us identify accurate customer buying patterns.

If most of your sales are coming from Google Search Ads, one might think to cancel other activities like Social Media or Email Newsletters.

Integrated Analytics shows that maybe 40% of customers follow the Facebook page for 2-3 weeks before making a purchase.

Or maybe an email subscriber is more likely to make a second purchase. This information helps you build a campaign with maximum ROI, with the ability to change month by month.
