**What are the most disturbing
emerging problems for global
development, practical and /
or theoretical?**

THESIS

The overarching problem for global development is sustainable development. The plight to ensure sustainability is bringing into question every development effort made, hindering rather than progressing its application.

While sustainability is the key objective in 21st century global development, in order to maintain such efforts, states require some foundational infrastructure, namely being able to and willing to address matters of corruption, conflict and resources.

AGENDA

Overview

Corruption

Case Study: Tajikistan

Conflict

Case Study: India

Resources

Case Study: Antigua and Barbuda

Conclusion

Class Discussion

SUSTAINABLE DEVELOPMENT

Thecasesolutions.com

Integrating the economic, social and environmental objectives of society in ways that maximise the well being of people living now, without compromising the ability of future generations to meet their needs.

OECD POVERTY REDUCTION REPORT 2014

Life Expectancy: 41 - 62 years

Infant Mortality: 50% decrease

Primary School Enrollment: 100% increase

Still in Poverty: 1 / 4 people

Threats to Success: Conflict and Environment Strain
