What is Scrum?

Thecasesolutions.com

- Scrum is a way for teams to work together to develop a product.
- Scrum is an Agile framework for completing complex projects.

Thecasesolutions.com

Why use Scrum?

Scope Management

Thecasesolutions.com

How the customer explained it.

How the project leader understood it.

How the analyst designed it.

How the programmer wrote it.

What the customer really wanted.

Roles

Thecasesolutions.com

- **Product Owner (1)**
- **Scrum Master (1)**
- **Development Team (3 to 9)**

www.pictofigo.com
