

What kind of Economy is the U.S. anyways?  
*The U.S. Economy is a Mixed Economy. A Mixed Economy is a mixture of a Command Economy (Government Controlled) and Free Market (No Government Influence) so there is a small influence by the government in the US economy but we can make our own choices most of the time.*

What is the stock market?  
 When companies are in need of cash, they can go to the stock market to sell shares of ownership in their company. When more people own a share of a company, the stock price goes up. When fewer people own a share, the stock price goes down.

Why is the employment rate so low?  
 TheCaseSolutions.com  
 The unemployment rate is so high because there have been many layoffs in the global market. The layoffs have led to a recession and many have lost their jobs.

What is the stock market?

When companies are in need of a little extra cash they go to the stock market to sell stocks, or small portions of ownership in their company. When ever a person wants a little cash they go to the stock market as well, to buy a stock and later get a little bit of cash from that stock down the road.

Why is the employment rate so low?

TheCaseSolutions.com

The unemployment rate is so high because there have been major layoffs on the federal label. The firefighters, teacher, police and nurses have really felt the impact from it.

An icon showing a person with a large question mark above them, standing on a cloud of words, with the word 'UNEMPLOYMENT' written below.

How large is the US economy?

TheCaseSolutions.com

The US (according to the CIA World Factbook) "is the most technologically powerful economy in the world!" The US has a GDP per capita of \$48,100. So in other words, the average american person makes \$48,100 dollars every year

A stack of US dollar bills, including a \$100 bill and several smaller bills.
