## Share Buyback

### Meaning of Share Buyback

When a company repurchases some of its own stock, it can be accomplished through one of two ways:

1. The company can tender an offer to existing stockholders. A tender offer invites shareholders to sell their stock, generally at a price above the market price, within a certain period of time.
2. The company can purchase shares of its stock in the open market, similar to the way individuals would. In this case, the company would simply pay market price.
