# Individual Assignment Harvard Case Solution & Analysis

*What are the differences in student and teacher use of technology? How has this evolved?*

The major difference between student and teacher use of technology is that students have grown up with many different uses of technology whereas some teachers are having to learn how to use it(Warlick, n.d).

## *teacher use of technology*

- grading books
- talk with other teachers
- technology in the classroom

*technology for  
students*

- research for projects
- find images
- class presentations

*evolution*

all of this has made the classrooms  
more interesting. students are more  
interested in learning.

## *evolution*

all of this has made the classrooms  
more interesting. students are more  
interested in learning.

## *The Three T's*

- Time- more time for lesson planning and students
- Tools- smart boards and projectors
- Telecommunication- technology helps teachers communicate

What further expectations should be in place in classroom use of technology?

Teachers should monitor the students when they are online. students should learn how to tell if it is credible site or not for doing research.
