

Climate Change and the Napa Valley Wine Industry

Harvard Case Solution & Analysis

Climate Change

Climate change is happening everywhere and it affects a lot of things. But why is it bad for the Napa Valley?

What is Climate Change?

Changes in the earth's climate system are called climate change. This includes the greenhouse effect.

What are the causes of climate change?

What have we been doing to cause climate change?

We have been doing a lot of things to cause it; some even without realizing it.

What will climate change in Napa Valley?

The climate change in Napa will make it warmer. Grapes are sensitive. If we don't grow grapes, Napa might lose profit.

Closing

In conclusion, climate change is bad and we should do our best to prevent it. If we can prevent climate change, we can prevent the Napa Valley from becoming too warm or too cold so we can keep growing grapes.
