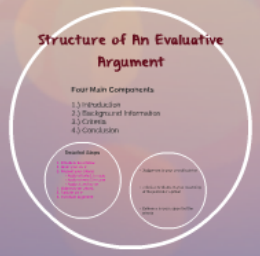
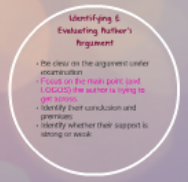
# Evaluate each of Hub's arguments Harvard Case Solution & Analysis

## TheCaseSolutions.com





### Examples

1.) Espe decided to go to a movie with Phoenix. Phoenix wanted to see a scary movie but Espe wanted a good laugh. Because they could not decide between The Hills Have Eyes and Super Bad, they called Jazmin who is a movie lover to decide which one is better to see. Jazmin proceeds to tell them, "I think you should go see Super Bad because the engaging plot and charisma of the characters makes this movie a must see".

2.) The new experience restaurant themed after The Land Before Time is the new five-star restaurant in town. A reputable experience restaurant includes waiters who stay in character yet still accommodate the needs of guests, cleanliness, and of course, good food. Jazmin's visit to The Three Cave Haven showed inconsistent type support (poor service, not a dino-sour room, but you get it) of guest needs. A comedy during its most basic sense requires performances and every employee of the restaurant is responsible (inherent in the profession) to make each guest comfortable.

2.) The new experience restaurant themed after The Land Before Time is the new five-star restaurant in town. A reputable experience restaurant includes waiters who stay in character yet still accommodate the needs of guests, cleanliness, and of course, good food. Upon arrival at The Land Before Time, guests dressed in caveman type apparel greet guests with a grand exit where their grouped to all guests under a canopy. Seeing the meal there are many engaging performances and every employee of the restaurant is conscious of simply YOU! gestures to make each visit comfortable.

# What is an evaluative type argument?

**Definition:** Evaluative arguments make judgements on the topic being presented and is supported by reasons.

# "The Deets"

Analyzes whether the author's purpose is...

- Good or bad
- Fair or unfair
- Solid or shaky

*** Be sure to thoroughly support why this judgement is being made.**

## Two Tactics

We must be able to reinforce our position on the evaluation. To do so we can use two tactics of support.

1.) Measure the subject or purpose of the evaluation against a classical definition of what it is supposed to be.
**Example:** "Spanking is wrong because *it is a form of child abuse.*"

2.) Explain why the author's subject or purpose is i.e. good or bad, strong or weak.
**Example:** "Spanking is wrong because *it causes long-term psychological damage to the punished child.*"
