Exhibition of Evolution: the Species of the Galapagos  
Madeline High

# The Face of the Islands: Lonesome George's Story

- Lived over 100 years
- Last known Pinta tortoise in the world

# Research Question

How did Darwin draw the conclusions he made about species while traveling to the Galapagos?

# Thesis Statement

Darwin concluded his theories of natural selection and descent with modification from:

- Tortoises
- Colors of the blue footed booby and frigate bird
- Flightless cormorants
- Marine iguanas
- Finches
