Synopsis

- AmeriBank is trying to determine how create a more convenient transaction method based around online banking for their customers
- They intend to survey people near their area to get an idea of to conduct their online banking based on their customer demographic
- They are looking to hire the surveying company that can perform the survey for the least cost

Sophisticated Surveys

Sophisticated Surveys is a surveying company competing for the project

We intend to minimize the cost of the project by creating a linear model

Our bid will be 115% of the cost of the project

Given Constraints

- The company would like to survey people in four different age groups and from three different types of towns
- 2,000 people were to be surveyed, given a minimized percentage of the total of people surveyed in the given age group and town

18-25 Age Group: 20%
26-40 Age Group: 27.5%
41-50 Age Group: 15%
51 and over Age Group: 15%

Silicon Valley: 15%
Big Cities: 35%
Small Towns: 20%
