

EDUCATIONAL CHANGES Harvard Case Solution & Analysis

10 years ago

School is a wonderful place, it is a stage where the actors have many roles: children, students, educators, tutors, helpers, volunteers and so on... If you are at school you can choose any role you want and every time find out something new and important for your life experience. It doesn't matter when it is now or 10 years ago...

Students and Their Parents

I remember very well the students of 2000-s and their parents. They were interested in education and understood well an educated person can achieve more in future life. They used to read books and didn't argue with teachers. They followed school rules and were ready to be more active and socialized.

Students and Their Parents

I remember very well the students of 2000-s and their parents. They were interested in education and understood well an educated person can achieve more in future life. They used to read books and didn't argue with teachers. They followed school rules and were ready to be more active and socialized.

School Activities

It was an uncertain period of time not only in education but also in the whole life. School didn't have any new philosophy. After long time Pioneers and Young Communists were forgotten and there was no option to recover the educational potential. After-school activities were so primitive and aimless and students didn't want to be involved in it.

Equipment and Teachers

It was very difficult to find well-equipped classrooms and teachers who were involved in new technologies. They had textbooks and used to teach old-fashioned way. The main idea of teaching was to give more knowledge but not to adapt students for the future life. The only means they utilised was blackboards and chalk.

The

"Education is the only way to change which you can see."
Nelson Mandela

School is a wonderful place where the actors have many roles: teachers, educators, tutors, helpers... If you are at school you can learn and every time find out something new for your life experience. It was 10 or 10 years ago...
