What in the world are we responsible for?

What will the future of food be like?

History (Monica)

- How has people food consumption changed over the past years?
- Has peoples nutritional diet changed over the past years?
- What are the needs fo a sustariable food future?
- Why has the uprise in food expenses caused a crisis for people in poverty?

Social and Cultural (Peilin)

- How will food allergies affect us in the future?
- How will fast food affect us in the future if we do not make a change?
- What causes eating disorders?
- What are the factors affecting food choice?

Environment (Faith)

- Why is urban farming important?
- How is climate change affecting agriculture?
- What is the impact of water scarcity?
- Are there any concerns between food and biofuels?

Technology (Laura)

- Are cloned animals safe for food consumption?
- In the future, will genetically modified foods replace the foods we eat today?
- Does the excess use of growth hormones in animals affect our health when we consume it?
- What are space foods, and would these foods become part of people's diets in the future?

The Historical & Economical trends of Food

By Monica Chen

Has peoples nutritional diet changed over the past years?

- According to a recent study at the University of Colorado, the nutrient density of food has declined significantly over the past 100 years. In fact nutrient density has declined approximately 40-60% over the past 100 years.

- That means that our food today typically has 50% fewer nutrients compared to the food that our grandparents ate.
