# Imported Stuffed Animals

China Dynasty project

Jacob, Paige, Terrell, Wyatt

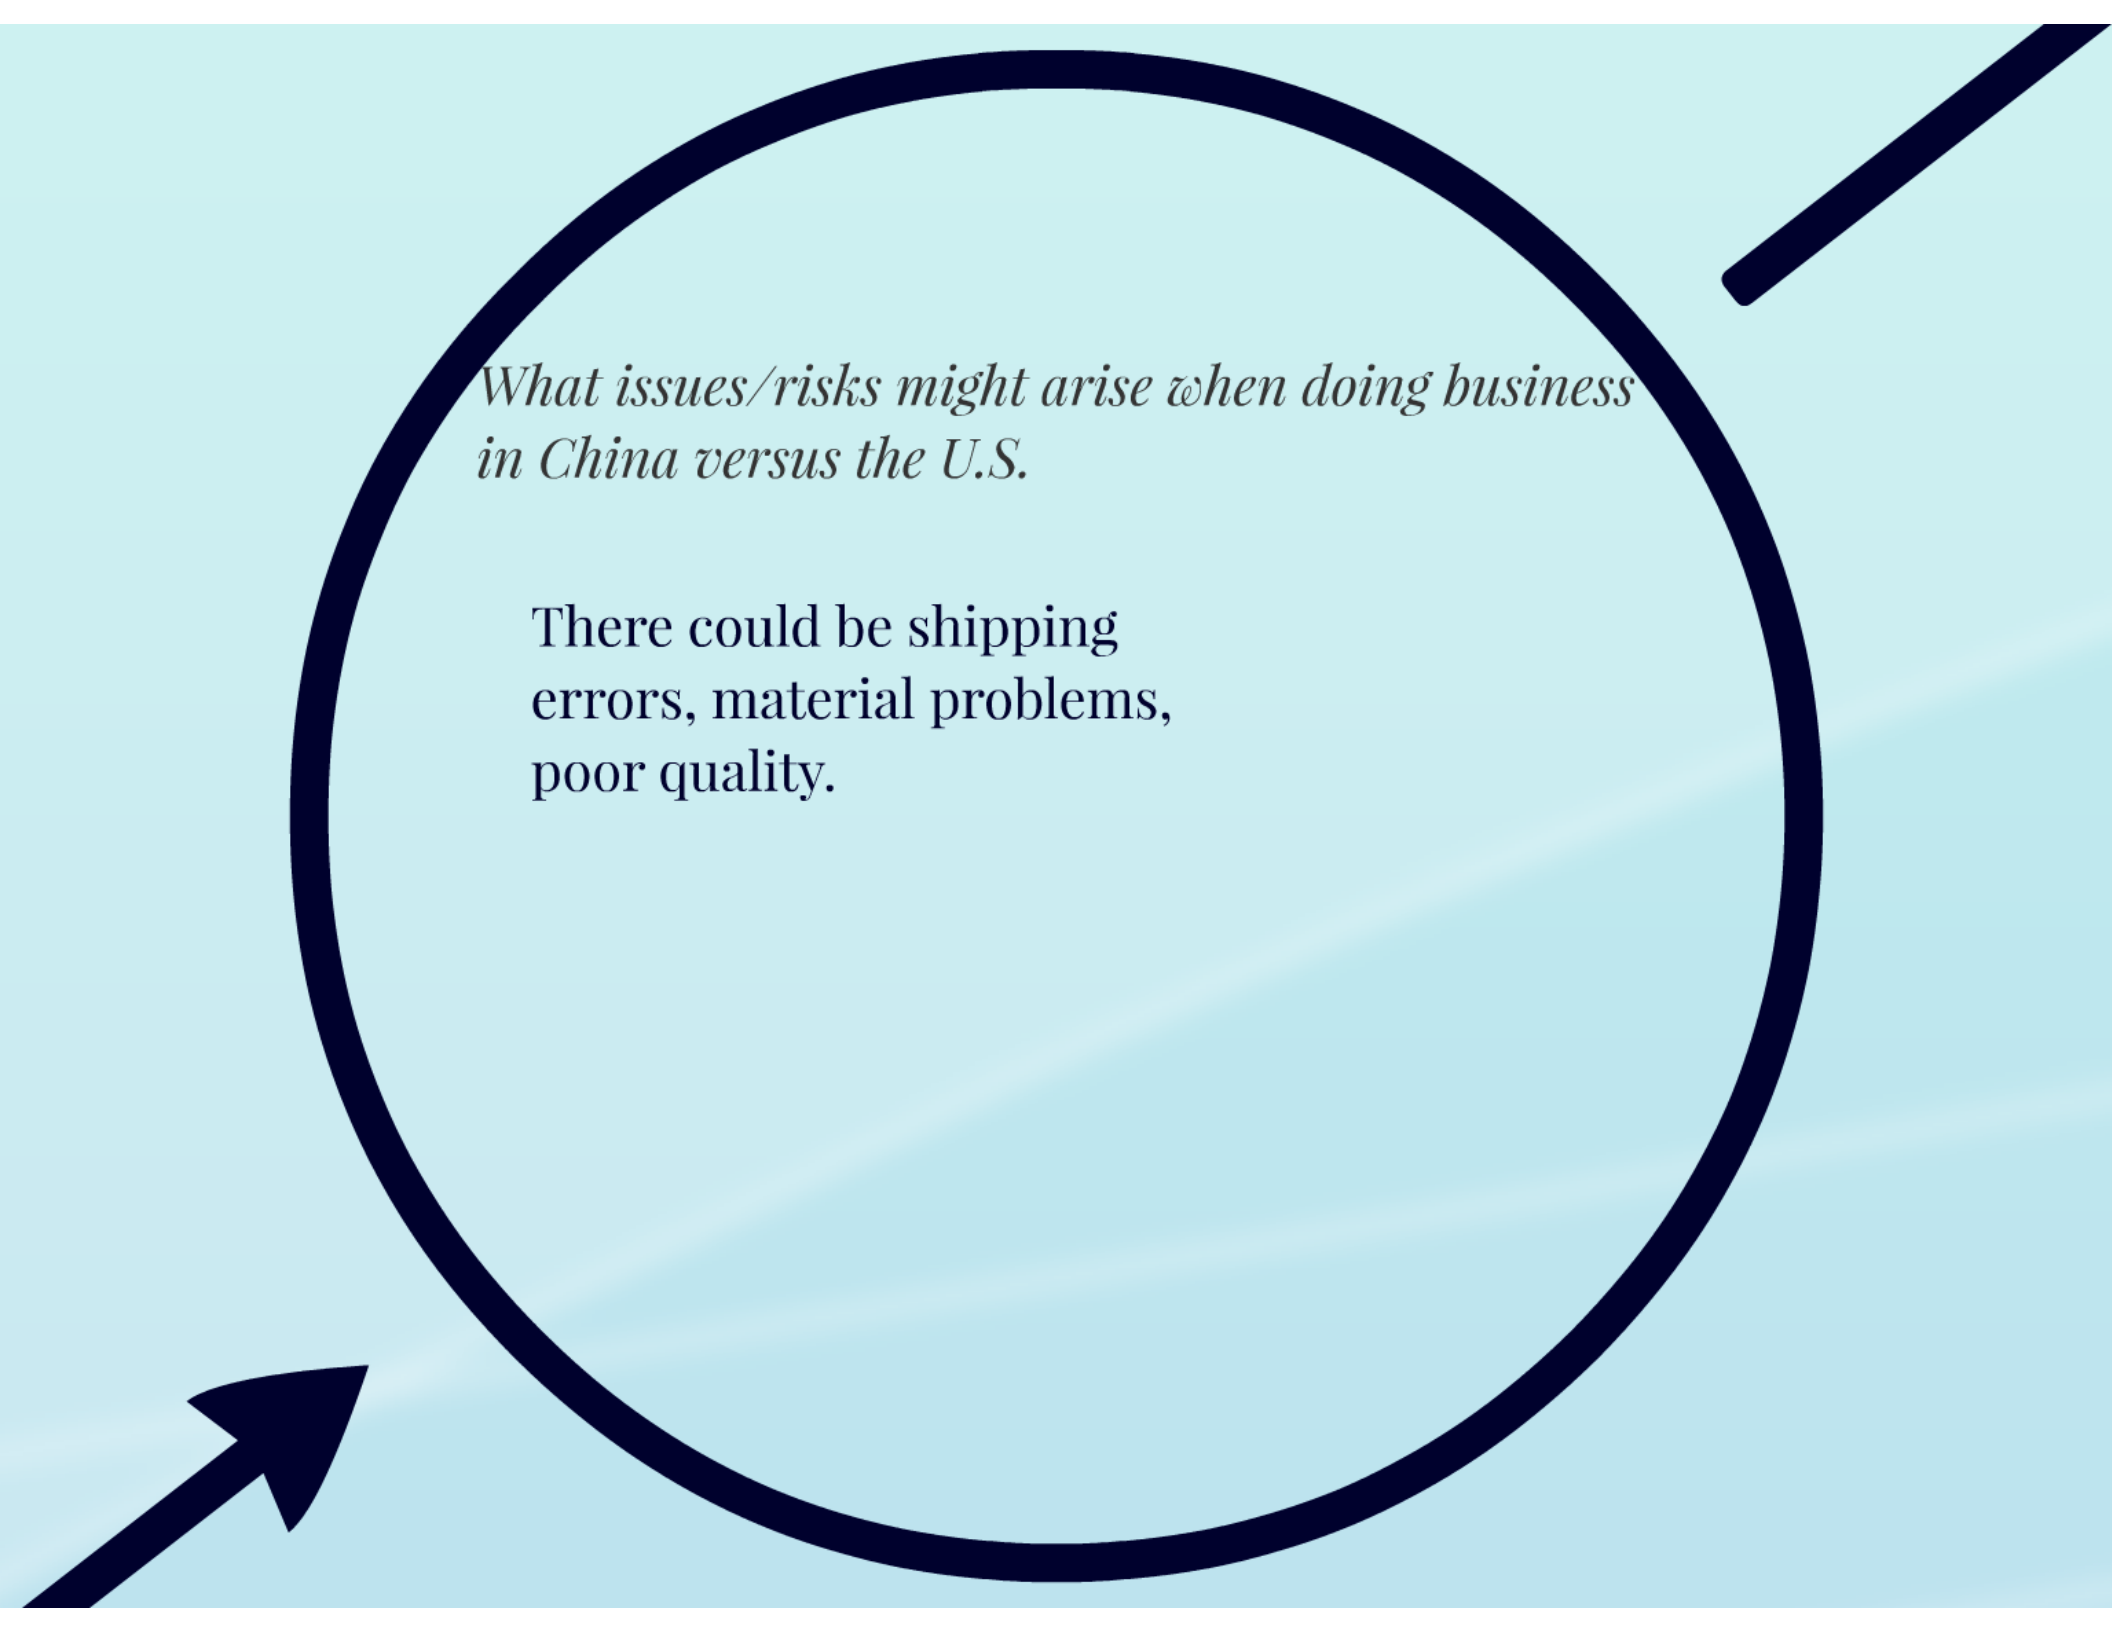

*Why does it cost less to produce the stuffed animal in China and transport it to the U.S. versus producing it domestically?*

Labor cost is cheaper in China and it cost more to purchase in the U.S. so you make more dough

*How will the team get their stuffed animal produced  
and on the shelves in the U.S.?*

We will send our company to China to produce our  
stuffed animal at cheaper cost of labor.

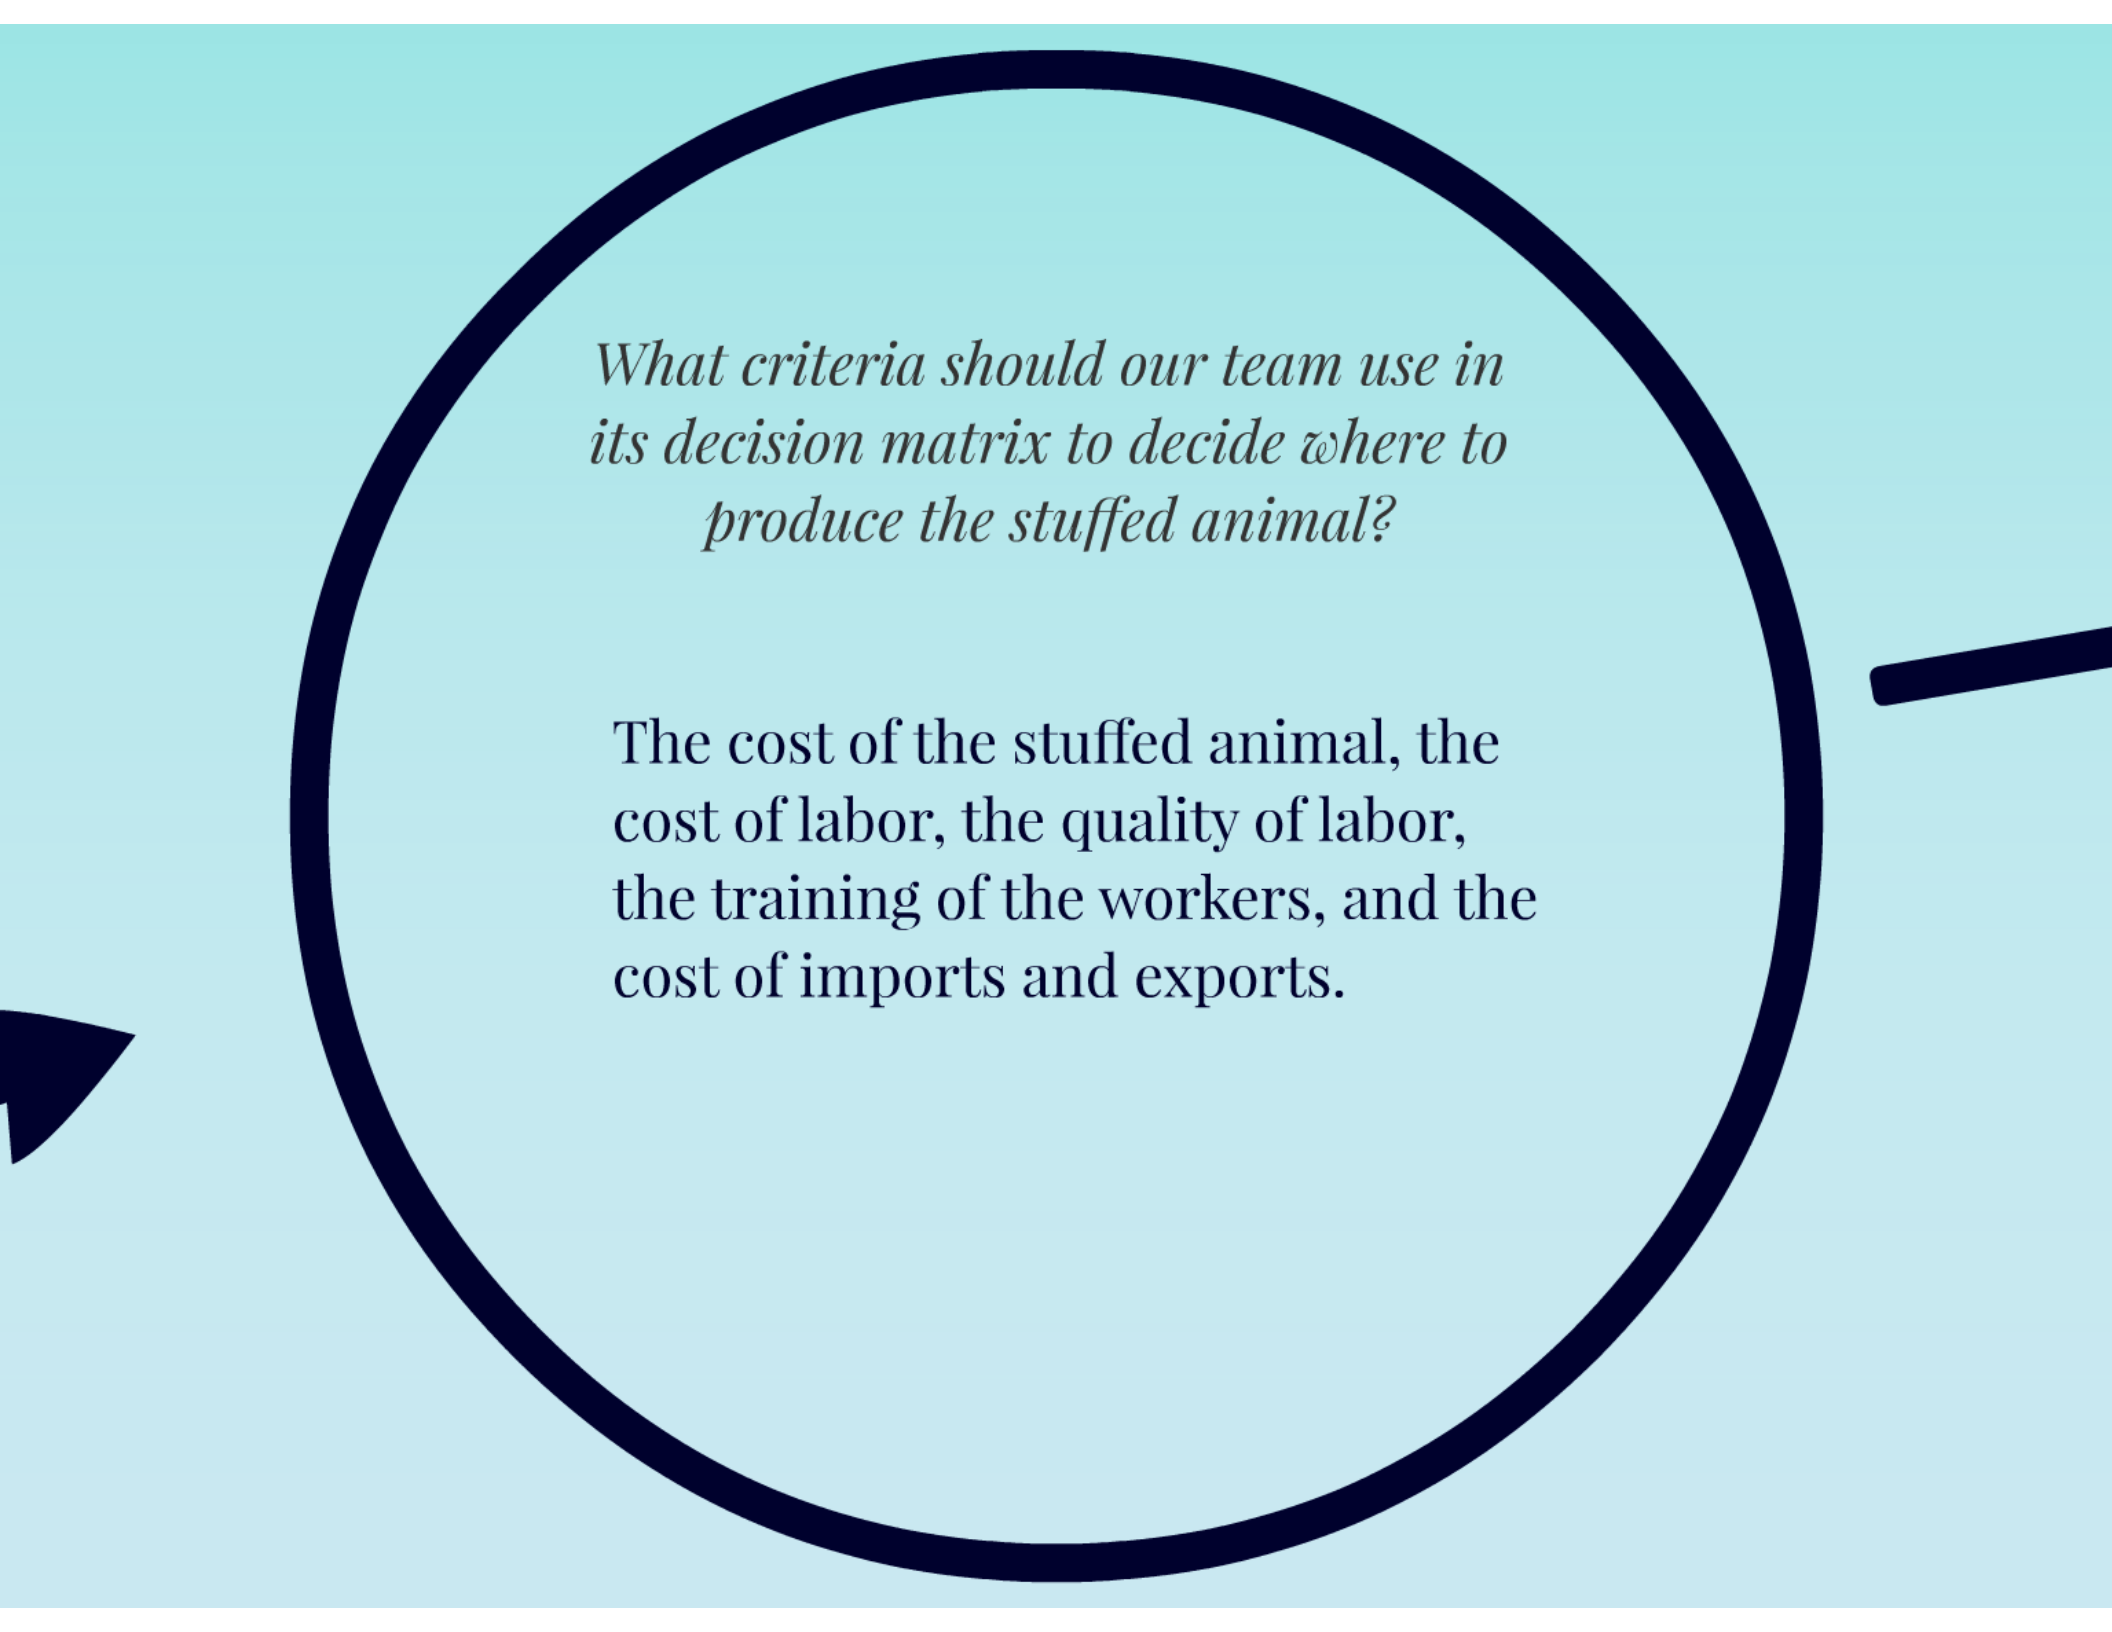

*What issues/risks might arise when doing business in China versus the U.S.*

There could be shipping errors, material problems, poor quality.

What are some ways to  
overcome those issues/  
risks?

We can train workers, and import  
our own materials.

*What criteria should our team use in its decision matrix to decide where to produce the stuffed animal?*

The cost of the stuffed animal, the cost of labor, the quality of labor, the training of the workers, and the cost of imports and exports.
