The ABC book of energy

By: *Claire Piatt*

B- Sound
Sound is vibration travel through out.

A- Acoustics
The number of times sounds repeat with each other and for how long time.

C- Conduction
Heat transfer with a material or between materials that are touching is called conduction.

D- Doppler Effect
The change in frequency of a wave as its source moves in relation to an observer is called the Doppler Effect.

E- Eardrum
The eardrum is a small, tightly stretched, drum like membrane.

F- Fossil fuels
These fuels, which include coal, petroleum, and natural gas, are known as fossil fuels.

G- Gravity
Gravity attracts all object

B- Sound
Sound is vibration travel through out.

A- Acoustics
The number of times sounds repeat with each other and for how long it lasts.

C- Conduction
Heat transfer with a material or between materials that are touching is called conduction.

D- Doppler Effect
The change in frequency of a wave as its source moves in relation to an observer is called the Doppler Effect.

E- Eardrum
The eardrum is a small, tightly stretched, drum like membrane.

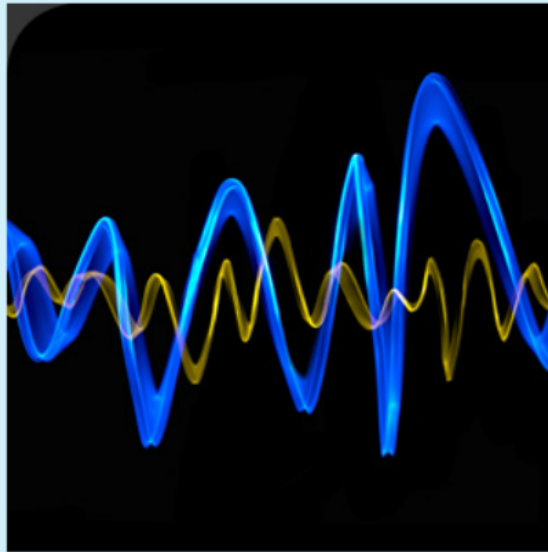

F- Fossil fuels
These fuels, which include coal, petroleum, and natural gas, are known as fossil fuels.

G- Gravity
Gravity attracts all object

A- Acoustics

The study of how sounds interact with each other and the environment.

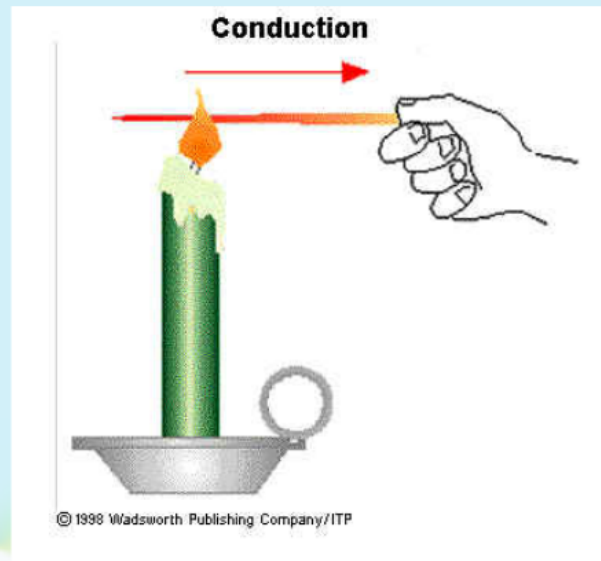

B- Bend

Bend is another word for diffract.

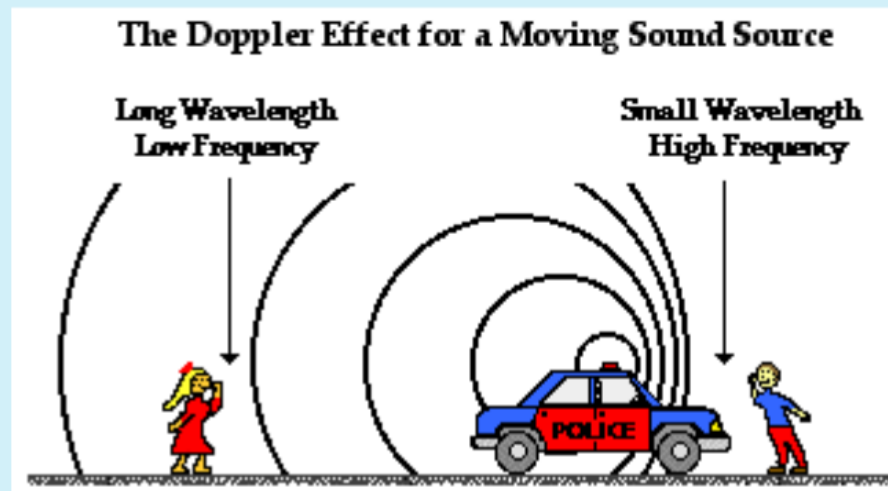

C-Conduction

Heat transfer within a material or between materials that are touching is called conduction.

D- Doppler Effect

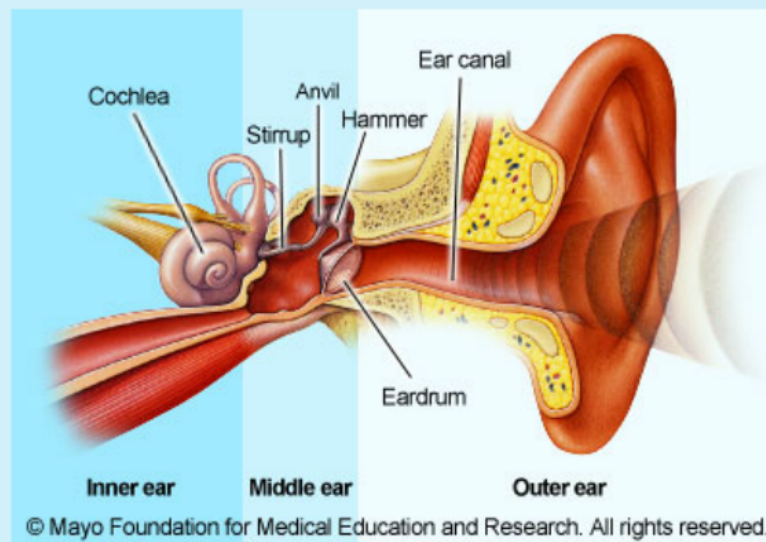

The change in frequency of a wave as its source moves in relation to an observer is called the Doppler Effect.

hat are

E- Eardrum

The eardrum is a small, tightly stretched, drum like membrane.

F-Fossil fuels

These fuels, which include coal, petroleum, and natural gas, are known as fossil fuels.
