## *Vision & Mission*

- Use fewer resources
- Create a healthy globe
- Decrease pollution
- One of the most eco-efficient fleets

## *Purpose of study*

- The purpose of our study is to find the relationship between Emirates airlines' services and how it affects a consumer's decision to travel with it, such as the entertainment section (ICE), food and beverages, cabin atmosphere, prices and the air miles.
- Our hypothesis is that if Emirates' decreases their main negative attributes then their customer satisfaction would increase.

### Off flight services:

- Time performance for any airline is very critical, for it impacts the preference of passengers.
- Airline passengers are very price sensitive seems to be. This depends on their economic status.
- Research indicates that more efficient the luggage processing system is, the more satisfied a customer will be with the airline service.
