Thecasesolution.com

Should we do this?

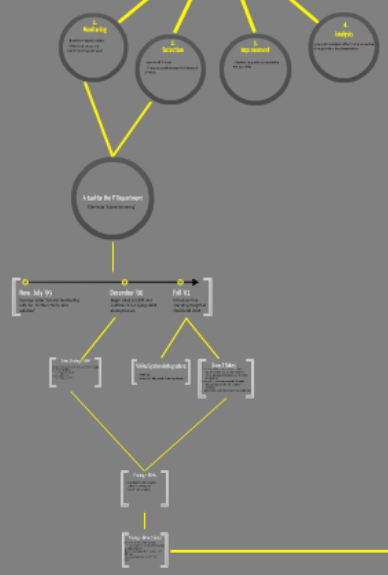
Reasons not to:

- operating losses for past 4 years; risk- focus on current products and cost management

Reasons to:

- Customer feedback- important metric for customers is end-to-end response time
- Solution, not product provider

"What should it look like?"



Thank you, questions???

Should we do this?

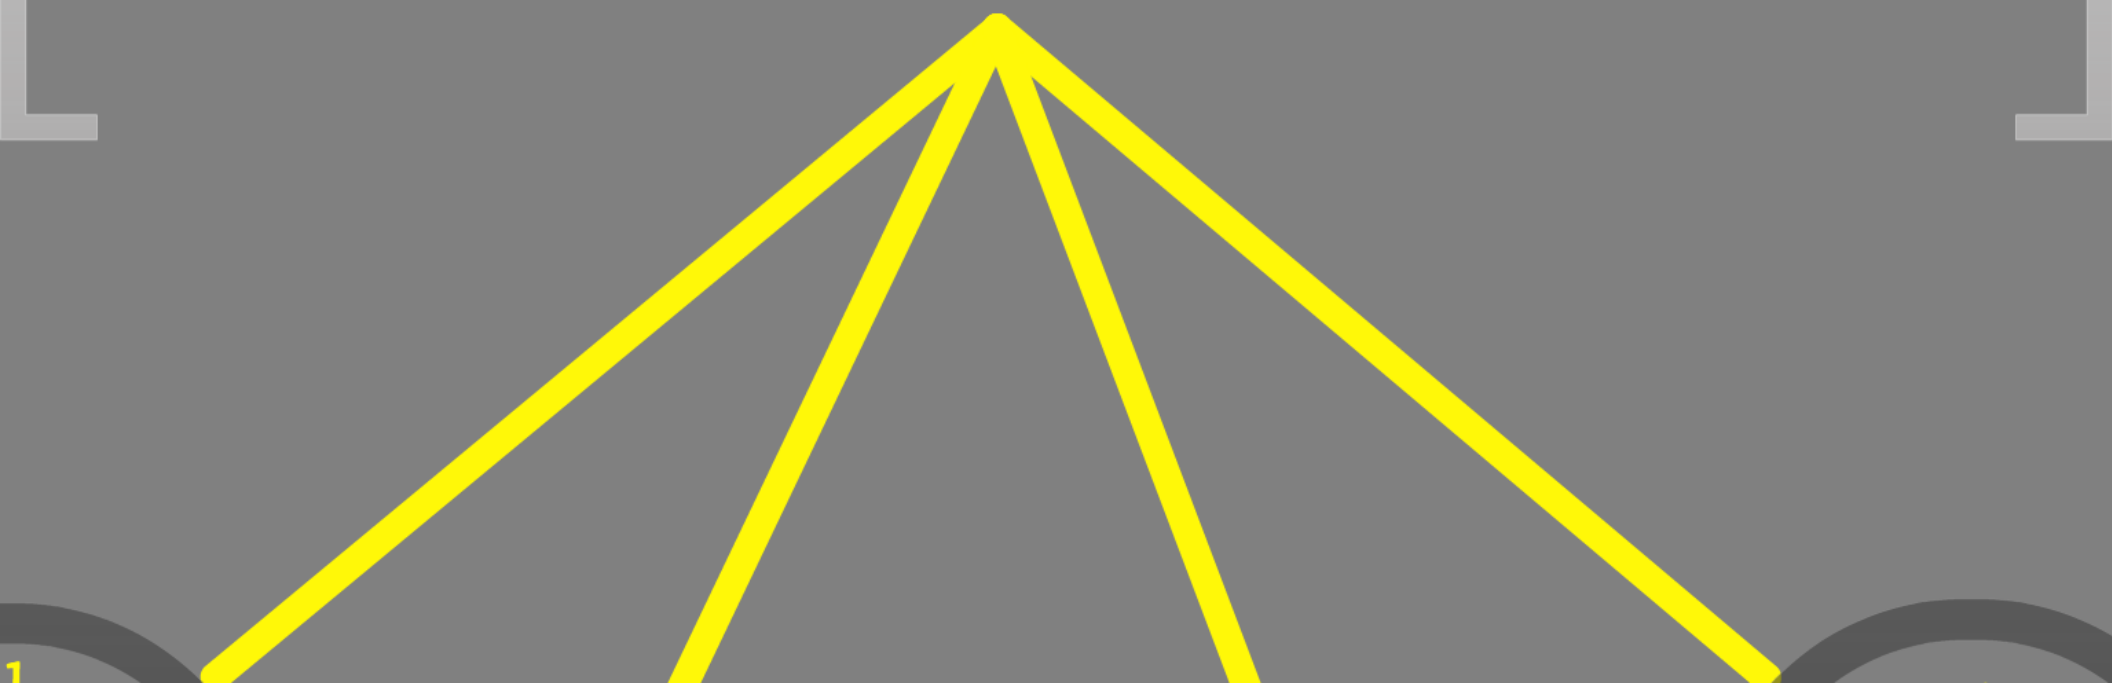
Reasons not to:

- operating losses for past 4 years; risk- focus on current products and cost management

Reasons to:

- Customer feedback- important metric for customers is end-to-end response time
- Solution, not product provider

"What should it look like?"



1. Monitoring

- Real-time functionality
- Historical record for benchmarking purposes

2.
Detection

- Across all 5 tiers
- Compare performance to historical metrics
