What is a stock market?

Stock market:

- an organised market for the trading of company stock/ shares and derivatives
 - purpose: assisting, regulating and controlling business in buying, selling and dealing in securities
 - securities listed on a stock exchange
1. Primary market: that part of the capital markets that deals with the issuance of new securities
 2. Secondary market: the financial market for trading of securities that have already been issued

What is a stock market?

Stock market:

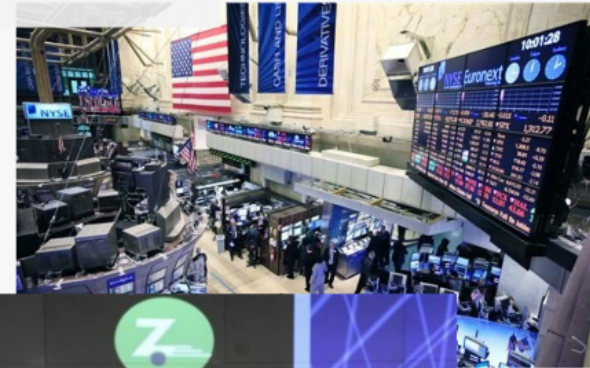

- an organised market for the trading of company stock/ shares and derivatives
 - purpose: assisting, regulating and controlling business in buying, selling and dealing in securities
 - securities listed on a stock exchange
1. Primary market: that part of the capital markets that deals with the issuance of new securities
 2. Secondary market: the financial market for trading of securities that have already been issued

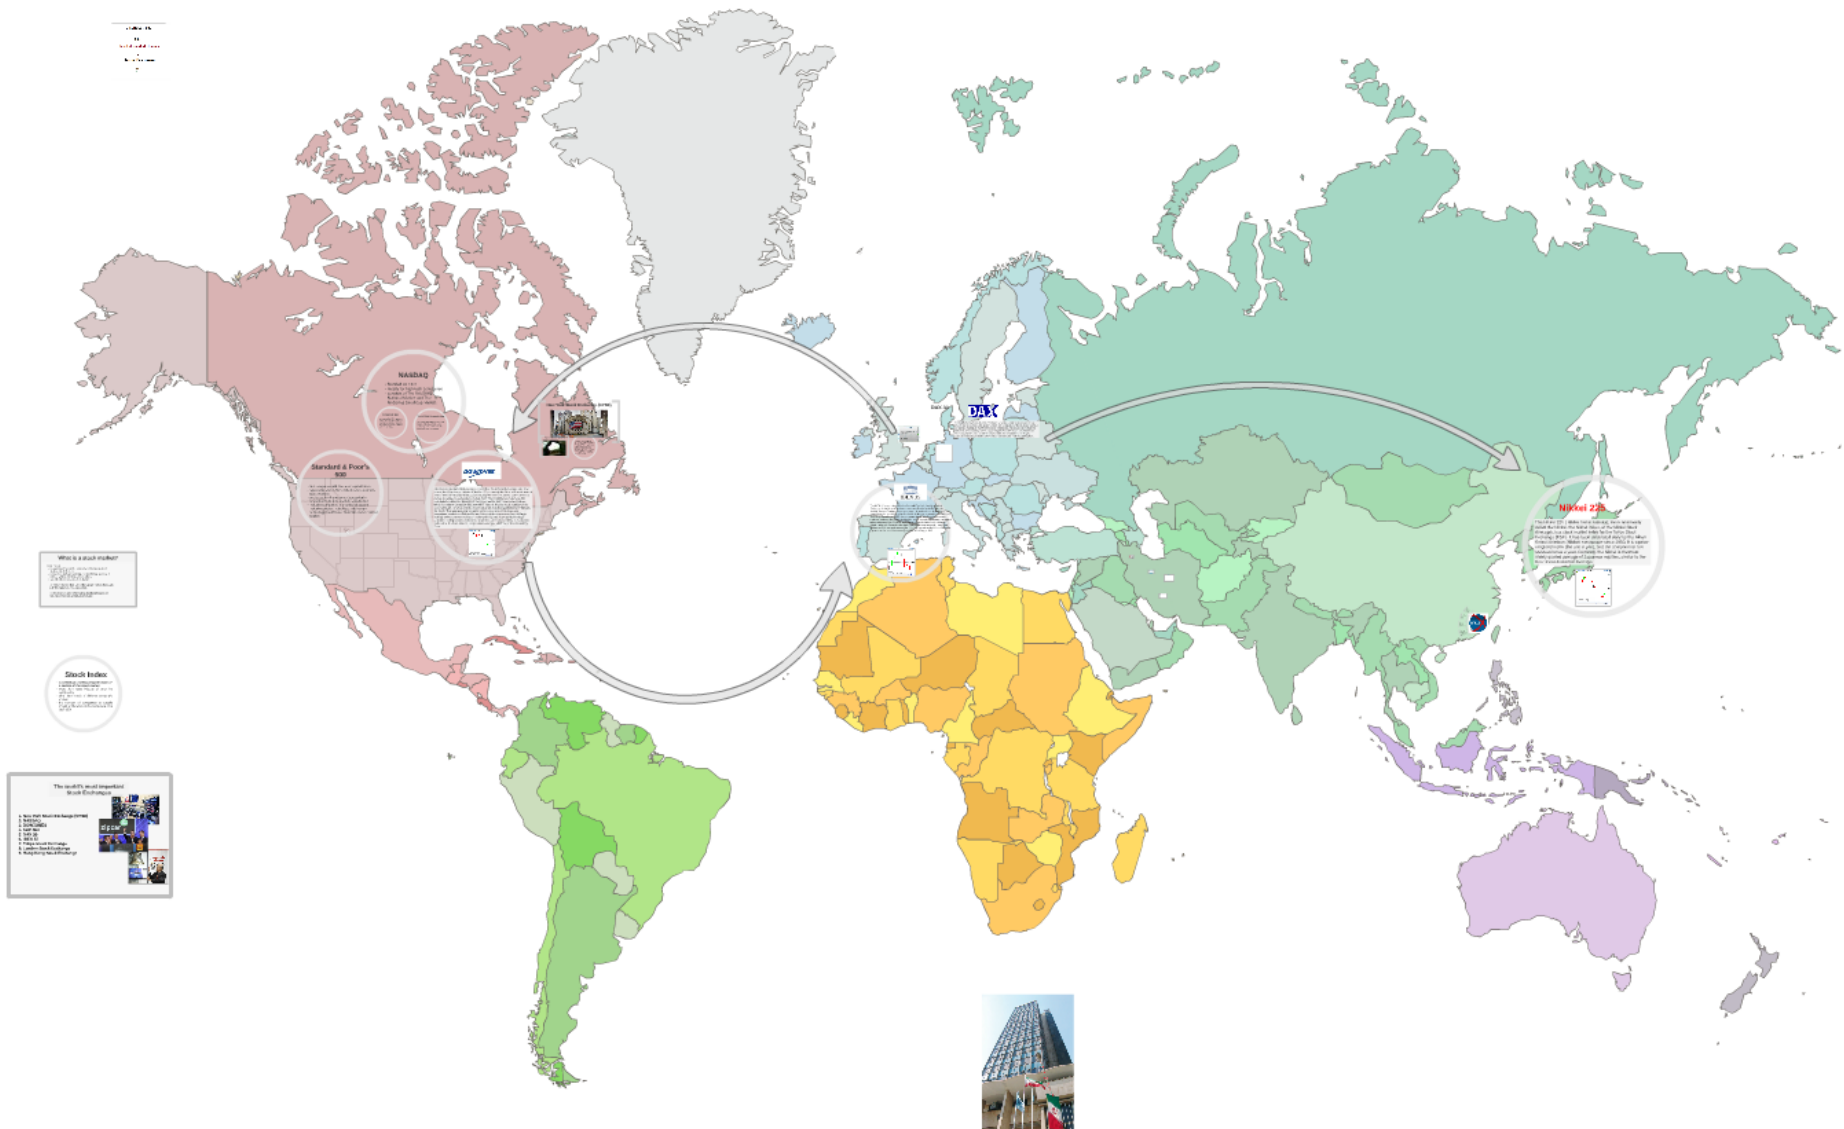

Stock Index

- *is a method of measuring the value of a section of the stock market*
