# What is Biometric?

Bio

Metric

# Real Samples

## Fingerprint Reader

- Study the individual's fingerprint
- Most commonly used biometrics
- especially the government sector
- Reliable and efficient

## DNA Biometric

- Deoxyribonucleic acid (DNA) can be obtained from hair, nails or any sources that has been attached to part of the body for some time.
- Paternity testing
- Identification of missing people
- Murder cases

## Advantages

- High level of security
- User friendly

## Disadvantages

- Privacy issue
- Costly
