# AstraZeneca's Code /Rules

Our Code of Conduct and Global Policies are designed to provide clear direction as to how our high level commitments are to be translated into consistent actions across all areas of our business. We continue to review and streamline the range of standards and procedures that support the Global Policies to provide more targeted guidance on what is required of people in specific roles throughout the organisation.

To give effect to the Global Policies, all Senior Executive Team areas, including MedImmune, are expected to follow any global standards and procedures or, provided they are consistent with the Global Policy, their own local or functional standards and procedures.
