

TheCAsolution.Com

1. What does a company have to do to become a green company?
A green company is one that has a positive impact on the environment. This can be achieved by using renewable energy, reducing waste, and using sustainable materials.

2. Why would any business go to the trouble? Does it benefit them in any way? If it does not, who does it benefit?
A business may go green for several reasons. It may be a marketing strategy to attract environmentally conscious consumers. It may also be a way to reduce costs by using energy-efficient technologies. Finally, it may be a way to improve the company's reputation and attract top talent.

3. What did the company you chose do to implement the Ten Steps to Practicing Green Business?
Coca-Cola has made a lot of changes to its bottles out of plastic so that the company can save less plastic in the environment.

4. How have the changes they made helped the environment?
Coca-Cola has helped the environment by saving plastic and using plant.

5. How much cost is associated with green business practices?
It does cost a lot of money to go green, but it will pay off when they start to see the benefits of going green.

6. Do costs prohibit more companies from becoming Green Businesses? Why or why not?
Sometimes cost does prevent some businesses from going green, especially small businesses that do not make enough money, and therefore do not have the funds to go green.

Coca-Cola Bottles Goes Green

prohibit more
companies from
becoming Green
Businesses? Why
or why not?**
Sometimes cost does prevent
some businesses from going
green, especially small
businesses that do not make
enough money, and therefore
do not have the funds to go
green.

Coca-Cola Bottles Goes Green

1. What does a company have to do to become a green company?

Companies have to be making the environment better. For example, Coca-Cola has come green by making their bottles out of plants.

2. Why would any business go to the trouble? Does it benefit them in any way? If it does not, who does it benefit?

Companies go through this "trouble" to save the environment. It does not necessarily benefit them except for them knowing that they did something good for the environment.

3. What did the company you chose do to implement the Ten Steps to Practicing Green Business?

Coca-Cola has made their plastic bottles out of plant so that the company can save less plastic in the environment.

4. How have the changes they made helped the environment?

Coca Cola has helped the environment by saving plastic and using plant.

5. How much cost is associated with green business practices?

It does cost a lot of money to go green, but it will pay off when they start to see the benefits of going green.

6. Do costs prohibit more companies from becoming Green Businesses? Why or why not?

Sometimes cost does prevent some businesses from going green, especially small businesses that do not make enough money, and therefore do not have the funds to go green.
