- Resiliency
- Cultural diversity
- Multiple generations together in family units
- Caring community members who desire to make changes to better the lives of its citizens

## Community Diagnosis

**Risk for ineffective health maintenance** among the children & parents of Toiyas Native Elementary school, related to the community's increased poverty level, lack of time that parents have to take care of themselves and their children's health care needs, and lack of healthcare providers and clinics in the community, as evidenced by:

This elementary school with 95% of children on free/reduced lunches, high community unemployment rate, and high percentage of unvaccinated children and adults.

Healthy People 2020 – Applicable Health Goals

- Low income area within the Denton ISD - 22.5% of families fall below the national poverty level.
- Limited access to healthcare (no immediate physician/dentist offices)
- Low percentage of children with immunization compliance
- High percentage of absenteeism for children at Texas Rivera Elementary School
- Unemployment rate of 8.1% (national average is 5.9%)
- Low percentages of parent involvement within the school
- High amount of recreational and public park activities
- Limited number of recreational and public park activities
- Limited availability of transportation with no public transportation
- Limited access to the immediate area

- Improve access to comprehensive, quality health care services
- Improve the healthy development, health, safety, and well-being of adolescents and young adults.
- Document and track population-based measures of health and well-being for early and middle childhood populations over time in the United States.
- Improve health-related quality of life and well-being for all individuals.
- Increase immunization rates and reduce preventable infectious diseases.
- Improve the health and well-being of women, infants, children, and families.

### Short term goals

- Utilization of mobile health clinic
  - Identify health needs beyond the scope of the mobile clinic
  - Facilitating partnerships with other community resources.
- Long term goals:**

- Long-term goals:

- Decreased alienation for children at Tormes River
- Increased intersectoral compliance for children and families
- Easily accessible healthcare services
- Increase health-related independence within the community through health teaching to support the community in sustaining an improved health status

**Memorability:**

- Student absenteeism will be reduced by 10% within 2 years, measured via attendance census from the school records
- Vaccination compliance rates will be 100% within 3 years, measured via school records
- Numbers of patients utilizing the health clinic

- School records accessed to identify characteristics and annual asthma compliance both before and after the mobile clinic implementation
- Self report surveys for families with the target community to identify perceived health status and health care utilization both before and after mobile clinic implementation
- Data tracking and analysis of client visits to the free mobile clinic
  - number of families seen/visited
  - numbers of medications administered
  - numbers health teaching opportunities

A nurse will be prepared to assist the client in making a physician, nurse practitioner, or advanced practice nurse referral and to refer the client to a specialist. It is also possible that the client will be referred to a specialist or a specialist's office with a referral by the physician.

**Referral to the Specialist**

Health-care providers will be able to assist the client in providing health care on patients care. Students learn to assist patients, including assisting with work in collaboration with the nurse.

**Referrals and Referrals**

Students are able to be prepared to assist the client in making a referral to a specialist when the client is referred to a specialist. Students learn to assist the client in making a referral to a specialist when the client is referred to a specialist.

**Referrals**

The clinical staff will be prepared to assist the client in making a referral to a specialist when the client is referred to a specialist. Students learn to assist the client in making a referral to a specialist when the client is referred to a specialist.

- **Easily Accessible:** pre-written data within your file makes it easy to combine any task of those applications that may be needed for the current study, therefore to avoid outside of their immediate proximity.
- **Language:** although data is written in a standard form, it is not necessarily best written in the form in both Spanish and English. Educational institutions in Spain, England and Scandinavia.
- **Planning:** services and fees, including determining eligibility for the game, and determining insurance coverage with the help of the manufacturer. Information regarding the use of the game for research, and provided through the manufacturer, for example, such as information about, control devices, and other things.

- Educators of second persons in English as a Second Language (ESL) are required to attend a minimum of 10 hours of training in the use of the second language in their classroom
- Educational materials provided are in a form that is easy to use and understand
- Advertisements in English and Spanish
- The menu will include one staff member with a basic understanding of Spanish by the staff member

- **Travel and Hospitality**
  - The industry itself will be greatly affected by turmoil at Times Hotels, Sheraton & Grand Hyatt, as well as the fact that the industry will continue to experience leaner budgets.
  - The 2009-2010 season from April 1-30th will be the worst in Times history and many of the facilities from Marriott's time will be held at the Garden City Hotel. Investments in other hotels, including the new Sheraton.
- **Travel Services**
  - Travel agencies will be pressured to address unmet needs. The evidence is in the fact that the industry needs to be able to coordinate frequent travel and equipment scheduling. It would be a good idea to have a travel agency that can coordinate travel. The travel will be also easier for agencies in identifying those who are eligible for government insurance benefits and will help those agencies to be as necessary.
- **Advertising**
  - The industry will still do better than the Times, Times Square Advertising itself.
  - Higher advertising in high traffic areas like bus stations, USPS, grocery stores, apartment complexes.
  - Media relations and editorial content and editorial content.
  - Advertising in local newspapers.
  - Comments on advertising will include outdoor, transit and direct, services provided and the industry will continue.
