widely diverse country with an emerging economy that will be a key player in the 21st century which is fast becoming the known as the Asian Century

In economic sense they are growing as a major trade partner with Australia. In 2011 two-way-trade totaled 20.7 billion dollars between India and Australia with the main exports to India:

Iron and monetary gold, copper and copper ores, Crude Petroleum, Fertilizers. India has become our eight most traded bilateral partner. As they grow as a major power by this is set to only increase even further.

One aspect of India's importance to Australia is if we were to strengthen our ties with them it would strengthen our ties with another close friend the USA as it is one of the most pro-American countries causing a trio to develop that all share similar beliefs such as democracy. Thus the need to develop an understanding of the country, its culture and its people.

With approximately 450,000 Indians living here in our universities, the understanding of India will allow us to create a greater friendship with the world's largest democracy, Australia already has but the increase of understanding of the differences will only strengthen the friendship between Australia and India.

India & Australia's Relationship

In India, the focus is on automation regarding the automotive industry.
